## **DETAILED ACTION**

### ***Information Disclosure Statement***

Information disclosure statements filed 8/17/06, 10/18/06 have been considered.

### ***Allowable Subject Matter***

Claims 1, 3-15 are allowed.

The following is an examiner's statement of reasons for allowance:

As cited in the International Search Report (PCT/ISA/210), curable resin compositions for forming optical waveguides are known in the art. JP2004-010849A discloses a close prior art where the resin is produced by reacting epoxy with silane component via hydrolysis (paragraph [0021-0022]). JP2002-275445A is another prior art reference that discloses silane modified epoxy resin (paragraph [0008—[0009]).

However, none of the prior art fairly teaches or suggests such curable resin compositions comprising first and second resins, where the first resin contains hydrolyzable silyl group, which the first resin is produced by reacting bisphenol epoxy resin with either tetraalkoxysilanes, or alkyltrialkoxysilanes; while the second resin contains, per molecule, at least one functional group that is reactive with an epoxy group, as claimed in the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2874
